

2. Testers who do not complete the requirements of #1 must be an experienced member-trainer of North American Sheepdog Society.

3. All other testers will be considered and approved on a case-to-case basis.

4. Suggestions for herding testers in some areas may be obtained from the Working Program Chairperson.

5. If testers are paid, they should be paid by a designated person or club representative.

6. Testers shall be provided with a copy of these rules prior to the test and familiarize themselves with its provisions.

7. A tester's future right to test may be revoked if he/she does not act in the best interest of the Program, by passing unsuitable dogs or any other violations.

### Passing Requirements for Herding Certificates

A dog who, after a period of introduction, shows sustained interest in herding livestock, either circling or attempting to gather them or follow them as if to drive them. A dog who barks (either a little or a lot), a dog who shows "eye" (either a little or a lot), one that works quietly, a dog that may feint to nip (or actually nips of larger animals), PROVIDING IT IS NOT A THREAT TO THE HEALTH OR SAFETY OF THE LIVESOCK, are all passable. It is to be remembered that many dogs, through simple inexperience will make mistakes in their first exposures to livestock, but at all times the tester must see clear-cut evidence of herding instinct.

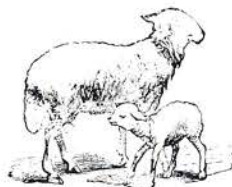

### Not Passable for Herding Certificates

A dog who, after a period of introduction, fails to show sustained herding interest in livestock, a dog that leaves or makes attempts to leave the working area, a dog whose interest is not strong enough to show a definable style, as determined by the tester.

A dog who shows aggression toward the livestock so strong and of a nature to be considered a threat to the health or safety of the livestock. Any dog that repeatedly splits the herd and attacks one or several animals with its teeth, or who grips any animal and holds on.

Any dog, that, for whatever reason, cannot be tested off-lead or with lead dragging in a fenced area.

Any dog that shows fear of the livestock in such a fashion that the dog cannot demonstrate herding instinct.
